JABEE has accredited engineering education programs in Japan since 2001. Listed here are engineering education programs of four-year undergraduate study/education at Bachelor Level accredited by JABEE until 2016. The institutions have voluntarily requested that engineering education programs be evaluated.

Programs are listed under higher education institution and in alphabetical order of program titles. The year indicated after each program title is the academic year when the programs were first accredited by JABEE and followed by final academic year of accreditation when programs discontinued or programs whose accreditation validity have expired (academic year starts from beginning of April and end at March). Students are deemed to have graduated from an accredited program providing they graduate from the program within its validity period of accreditation. Field shows which “Items to be Considered by Field” in “Criteria for Accrediting Engineering Education Programs” is applied to review the program.
