

## Engineering Education Programs at Master Level

Accredited by JABEE

Last updated: 1 July, 2019

JABEE has accredited engineering programs at Master Level since 2007. Listed here are engineering education programs of postgraduate study/education at Master Level, and accredited by JABEE. The institutions have voluntarily requested that specific engineering programs be evaluated.

Programs are listed under higher education institution and in alphabetical order of program titles. The year indicated after each program title is the academic year when the programs were first accredited by JABEE. Programs discontinued as well as programs whose accreditation validity has expired are identified by showing a final school year of accreditation (Note: Japanese academic year starts from beginning of April and end at the end of following March). Comprehensive review visits are normally conducted at six-year intervals. Students are deemed to have graduated from an accredited program providing they graduate from the program within its validity period of accreditation.
